OCV Series 65

Basic Valves

Aquestia
Directing the Flow

General representation

Fire Protection

Series 65 Basic Valve

Description

The OCV Series 65 control valves are automatic, hydraulically actuated, diaphragm operated, rigid seal globe and angle pattern valves. These valves are designed for use in fire protection applications, including deluge, pressure control, water, foam and seawater fire protection systems. The valves consist of three major components: the body, the bonnet and the internal diaphragm assembly.

Certification & Compliance

UL Listed (3"-10" with Buna-N Elastomers) under categories: QXZQ, VLFT & VLMT

ABS Type Approval

Factory Mutual Approved under categories 1361 & 1363

Fire Tested to EN ISO 19921

Consult the UL Listing Guide, or contact Aquestia USA for a complete list of approved applications & valve sizes.

Features & Benefits

- Listed & approved for use in fire protection systems by various global standards
- Quick opening; Non-slam closing operation
- Drip-tight shut off to ANSI FCI 70-2 VI seat leakage class
- Simple & reliable construction
- Easy installation & maintenance
- High-grade construction materials
- Reliable pressure control
- Low pressure losses at high flow rates
- Optional local or remote reset
- Optional electric, pneumatic & electro-pneumatic control trims
- Optional explosion proof solenoids & trim accessories
- Optional seawater & foam concentrate services

OCV Series 65

Basic Valves

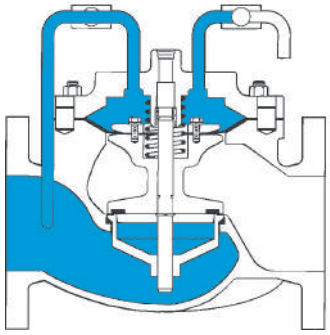
Aquestia
Directing the Flow

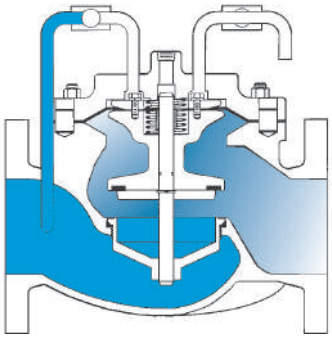
Operation

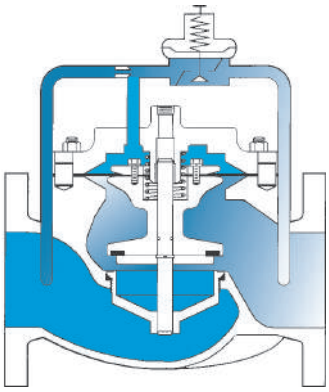
Valve Closed:
When line pressure from the valve inlet is applied to the cover chamber, pressurizing the diaphragm, the valve is closed drip-tight.

Valve Open:
When cover chamber pressure is vented, the valve shifts to the fully open position.

Valve Modulating:
The valve is between fully open and closed positions. The valve's control pilot modulates the pressure in the cover chamber, positioning the valve to control the desired pressure or flow. OCV pilot systems provide accurate control in a wide range of performance requirements.







Flow Characteristics

$DP = sg\,(Q/Cv)^2$ where: Q = Flow Rate in USGPM (Standard) or Q = Flow Rate in cubic meters/sec (Metric)
Cv = Flow Rate in USGPM @ 1 psi pressure drop (Standard) or
Cv = Flow Rate in cubic meters/sec @ 1 bar pressure drop (Metric)
DP = Pressure Drop in psi (Standard) or DP = Pressure Drop in bar (Metric)
sg = Specific Gravity of line fluid

Standard		
Valve Size	Globe Cv	Angle Cv
1 1/4"	23	30
1 1/2"	27	35

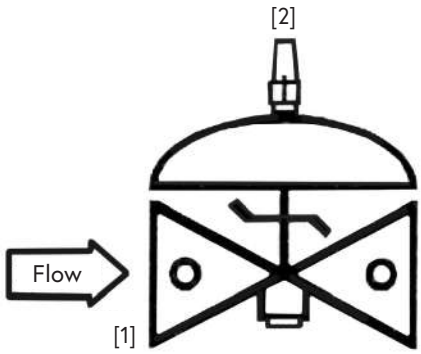
Resetting, maintenance, and periodic testing instructions must be followed as described in detail in the applicable OCV IOM (Installation, Operation & Maintenance) Manual.

Components & Typical Materials

The OCV 65FC consists of the following components, arranged as shown on the schematic diagram.

[1] OCV 65FC Basic Control Valve:
a UL Listed, hydraulically operated, diaphragm actuated globe valve which closes with an elastomer-on-metal seal.

[2] OCV 155 Visual Indicator Assembly (optional):
provides indication of valve position at a glance.



DRAIN PORT
(Water Supply Drain)
2" NPTF on 4" - 10"
1 1/4" NPTF on 3"

Part	Standard Material	Optional
Valve Body	Ductile Iron	Cast Steel, Stainless Steel, NAB
Seat Ring	Bronze	Stainless Steel, NAB
Stem	Stainless Steel	Monel
Spring	Stainless Steel	Elgiloy/MP35N
Diaphragm	Buna-N	EPDM
Seat Disc	Buna-N	EPDM
Pressure Reducing Pilot	Bronze	Stainless Steel, NAB
Tubing / Fittings	Copper, Bronze/Brass	Stainless Steel
